

JOSHUA BOEPPLE

9408 Willow Ridge Road Apt. 2G | Charlotte, NC 28210 | (803) 331-0716 | joshboepple@outlook.com

OBJECTIVE

Stewardship-driven Full Stack Developer and Project Manager with hands-on experience in logistics, technical support, and web application development. Adept at solving complex problems through intuitive, responsive design and collaborative workflows. Completed my Bachelor's in Web and Mobile Application Development, with a capstone Progressive Web App showcasing offline-first architecture, Firebase integration, and modular documentation. Seeking tech-forward roles that value adaptability, clarity, and impact.

PROJECTS

Emergency Prep Progressive Web App

INF 654 Mobile Web Development – Fall 2025

- Designed and deployed a fully functional PWA for emergency preparedness
- Implemented service worker, manifest, and IndexedDB for offline-first functionality
- Integrated Firebase for cloud sync and per-user data storage
- Built responsive UI and installable experience across devices
- Documented architecture and logic in a GitHub README.

Speech Innovation NC – Capstone Internship Project

INF 490 Capstone Seminar in Informatics – Fall 2025

- Collaborated with a real-world client to develop a web-based solution supporting speech therapy innovation across North Carolina
- Conducted stakeholder interviews and translated feedback into actionable development goals
- Designed wireframes and user flows to support intuitive navigation and accessibility
- Implemented front-end components using React.js and set up hosting through Netlify.

EXPERIENCE

Warehouse Associate

Amazon | Charlotte, NC

May 2024 - Current

- Operated efficiently within a fast-paced logistics environment, maintaining productivity targets in order fulfillment and inventory management.
- Executed receiving, scanning, picking, packing, and shipping processes using Amazon's proprietary systems and handheld scanners.
- Ensured compliance with safety standards and operational procedures, contributing to a zero-injury record across shifts.
- Collaborated with team members and supervisors to meet daily shipping quotas.
- Supported process improvements and lean initiatives to reduce waste and streamline workflows

Tenant Support Specialist

Roof Above | Charlotte, NC

June 2023 – Aug. 2024

- Delivered comprehensive support to residents transitioning out of homelessness, ensuring access to resources, community integration, and long-term stability.

- Facilitated case coordination and housing retention efforts through direct communication with tenants, service providers, and property teams.
- Advocated for tenant needs by connecting individuals with mental health care, employment services, and food assistance programs.
- Maintained accurate documentation and progress notes within internal systems, upholding privacy and compliance standards
- Contributed to a trauma-informed service model, fostering trust and safety within the supportive housing environment

EDUCATION

Bachelor of Science in Information Technology and Telecommunications

Fort Hays State University | Hays, KS

Completed Dec. 2025

Focused coursework in front-end development, mobile UX/UI, database management, and networking principles. Gained hands-on experience with HTML, CSS, JavaScript, SQL, and modern web frameworks. Projects include designing responsive web applications and integrating APIs to enhance user interactivity. Developed strong debugging, version control (Git), and deployment skills in collaborative environments.

Associate of Science in Information Technology

South College | Knoxville, TN

Completed Sept. 2022

Core curriculum covered systems administration, networking fundamentals, cybersecurity, and hardware/software troubleshooting. Gained practical experience in installing, configuring, and managing operating systems and virtual environments. Built foundational programming skills in languages such as Python and JavaScript. Developed technical documentation and communication skills critical to client support and IT service management. Applied problem-solving strategies in lab environments and hands-on coursework.

Full Stack Web Development Certificate

University of North Carolina at Charlotte | Charlotte, NC

Completed Jan. 2020

Completed intensive training in front-end and back-end development using JavaScript, HTML, CSS, Node.js, and React. Built and deployed full-stack applications utilizing RESTful APIs, MongoDB, and Express. Emphasized agile development practices, Git version control, and cross-functional collaboration. Developed responsive, user-friendly interfaces and dynamic web components through hands-on projects. Strengthened problem-solving skills through debugging challenges and real-world coding scenarios.

CERTIFICATES

- Mosyle Certified Admin (Mosyle Business) July 2022
- Mosyle Certified Admin (Mosyle Manager) July 2022
- Jamf 100 Certified Associate Exam (Jamf) April 2022
